WORK HISTORY

FULLSTACK WEB DEVELOPER   09/2022 to 12/2022

Black Bridge Technology

• Worked on the Inflow project, a web-based supply chain management system that digitalis every step of the manufacturing process.
• Designed user interfaces, developed API's and database models, and ensuring that the application met the client's requirements and provided an exceptional user experience.
• Leveraged skills in Next.js, Typescript, and Firebase to work on both the front-end and back-end of the web-based supply chain management system.
• Collaborated closely with the team to troubleshoot and resolve any technical issues that arose, ensuring the application's stability and reliability throughout its life cycle.

FOUNDER & PROJECT MANAGER   03/2022 to CURRENT

UnitCodeX

• Founded and managed the development of UnitCodeX, a software development company focused on delivering innovative solutions to clients.
• Led the development of multiple successful software projects, including a web-based Marketplace Platform
• Managed a team of 3-5 developers, assigning tasks and overseeing the development process to ensure the timely delivery of high-quality products.
• Utilized agile development methodologies to streamline the development process and improve project efficiency.

MERNSTACK DEVELOPER
05/2022 to 02/2023

UnitCodeX

• Worked on the Etmediamarket project, a big marketplace platform.
• Built the front-end part of the website using Next.js and Tailwind CSS, and integrated back-end APIs into the front-end.
• Developed the Admin-panel section, which included user, seller, and product management systems, utilizing technologies like Node.js, Express.js, and MongoDB for optimal performance and seamless integration.

UX & UI DESIGNER
09/2022 to 01/2023

EtmediaMarket

• Designed and executed user interface for Etmediamarket's customer-to-customer marketplace, resulting in increased user engagement and decreased bounce rates.
• Conducted user research and usability testing to inform design decisions and ensure an intuitive user experience.
• Created wireframes, prototypes, and high-fidelity mockups using Sketch and Figma.
• Iterated on designs based on user feedback and analytics data, resulting in a 20% increase in user satisfaction scores.

FULLSTACK DEVELOPER
03/2023 to CURRENT

Reveal Software Development

• Focused on the front-end part of the company's main website, using Next.js and Tailwind CSS to ensure a responsive and modern design.
• Executed design-related tasks like creating layouts, styling components, and debugging user interface issues according to business requirements and deployed the website after testing to production.
